TO: Review Team

FROM: Jeff Larson *JL*

SUBJECT: L1630200005 - St. Clair Co.
Sauget - Sauget Sites
Superfund - General Correspondence

The draft Final Investigation Report for the Sauget Sites has been delayed in it's development and submission to IEPA for review.

Ecology & Environment, Inc., has notified us that the number of sites in the study and the massive amount of information gathered has resulted in complicating the report preparation beyond what was initially invisioned. Every effort is being made to expedite the completion of the report and stay within budget limitations. The draft final report is expected to be prepared and submitted on March 28, 1988.

With this notification I again hope that all reviewing staff are able to adjust their work loads in order to participate in this review process. If team members are unable to dedicate time for a meaningful review please notify me so that we can replace you with another individual representing your respective background and/or interests.

With this notification please ignore the memo of January 21, 1988 and thank you for your participation.
